

PUBLIC NOTICE

The Town would like to remind residents that Public Works will be flushing hydrants and sewer lines throughout the community this week as part of our annual maintenance program. This work is an important part of maintaining and keeping our water and sewer infrastructure in good working order.

During this maintenance, residents may notice:

- Temporary low water pressure
- Discolouration or cloudy water
- Some changes in water flow while flushing is taking place

If you experience discoloured water, please run your taps until the water runs clear. If the discolouration persists beyond 24 hours, please contact the Town Office so we can look into it further. We understand that this maintenance can be inconvenient, and we appreciate your patience and understanding while our Public Works team completes this necessary annual work.

The Town Office is currently experiencing a high volume of calls, emails, and inquiries regarding the flushing. We ask residents for patience as staff work to respond to everyone as quickly as possible. We would also like to remind residents that abusive, threatening, or disrespectful language or actions toward Town staff will not be tolerated. Our staff are here to assist residents and appreciate being treated with courtesy and respect.

Thank you for your understanding and cooperation as we work to maintain and improve our community's infrastructure.
